# Safety Bulletin

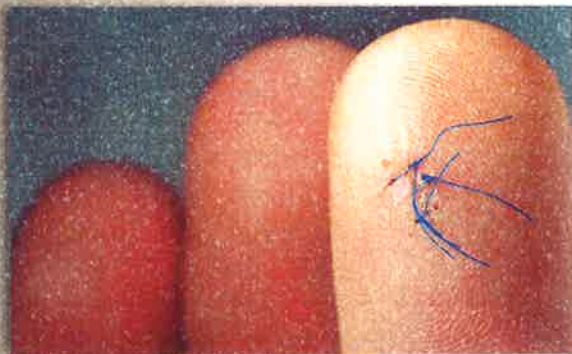

"Safety Matters...Because Lives Matter"

## Ways To Protect Your Hands

1. Wear appropriate protective gloves for the job or exposure. **Do not** wear loose fitting gloves when handling cargo.

3. Beware of "**pinch points**" when handling turn buckles, lashing rods, chains, and cables under tension. **Use caution** while adjusting vehicle seats, windows and doors.

5. **Do not use** broken/damaged equipment (lashing rods/chains/tension levers) and be sure to grip handles firmly. Be aware of **damaged ends** of unlocking poles.

2. **Never** push or pull suspended containers around chassis and bomb carts. **Never** place hands under suspended containers and be aware of **sharp edges**.

4. **Remove rings and wrist jewelry** prior to all cargo and container handling operations.

6. **Use care** when handling equipment. **Never throw** twist locks in cone bins or luggage in baggage carts.
